

Bet Elazraki Children's Home

Bet Elazraki Children's Home is composed of:

Bet Elazraki Children's Home

For boys and girls ages 6-12 years old who cannot live at home due to parental abuse, neglect or abandonment – or other serious conditions making it impossible for the child to live at home.

Bet Bogrot

This is a place where girls from the age of 13-18 years old live together and learn the skills needed to be independent and to prepare for a better future. Many grew up at Bet Elazraki, and they need this place to add continuity to their lives.

Bet Bogrim

The Klein Bet Bogrim designed for the needs of teenage boys 13 – 18 who can remain in the care of Bet Elazraki, but taking in to account the needs of a teenage boy.

Baby Emergency Shelter

This shelter takes care of babies as young until age 4 who were removed from their homes due to immediate danger from their parents or living situation. Many of the babies or young children were so neglected and abused that they need immediate medical attention. We are there to receive them from all over the country in this crisis center, 24 hours a day, 7 days a week, all year round.

Family Intervention Center

This is a center that is focused on trying to keep a family together, while giving a child in difficult circumstances the chance to succeed. The children arrive in morning to the Family Intervention Center before being bussed to the local educational facilities. After school they return to the center and benefit from all the activities and professional help as our children at Bet Elazraki Children's Home. However, the main difference being, that the parents also participate in the extensive therapy treatments. For the first time, a father learns how to properly bathe his child, or a mother begins to understand and implement the basic nutritional needs of a growing child. **Some children at risk can remain in their own environment when there is cooperation of the parents together with the professional intervention of our Family Intervention Center.**
